5<sup>th</sup> December 2014

**TO WHOM IT MAY CONCERN**

**RE: MARTIN OUMA CORNEL**

The above mentioned undertook industrial attachment in this institute's Information Communication Technology Department with effect from August 4th, 2014 to December 5th, 2014.

Martin had the opportunity to work and learn in the technical support, software development and Data management sections of the department. In particular, hands on job experience in preventive hardware maintenance, installation of software, Database design, website design systems administration and networking to mention but a few.

Martin is willing and able to learn if given an opportunity. He relates well with colleagues and has positive attitude to work.

Any assistance accorded to him will be highly appreciated.

Regards

Alex Gitonga

Ag. Chief ICT Officer
